Reference: **Helen Mathew**

## **Mountain Creek Architecture**

Walwa Primary school embarked on a major building project commencing in 2009. The School Council engaged Helen Mathew as architect/project manager and were very happy with that decision. Helen worked with us to make the design meet our specifications and was always open to our ideas. She thoroughly investigated all the best options for materials to use on a school project and met regularly with us to keep us informed of progress and give us the best advice along the way.

Helen liaised well with the Department of Education despite numerous delays and requests for further documentation than might normally be required.

During the building phase Helen was always present at site meetings and kept communications open between all parties concerned. In the end Helen made the whole project run smoothly and ensured that all works were satisfactorily completed.

We have been in our new building for over 8 months now and we are very happy with our new facility. Helen is to be congratulated, as working with a government body while ensuring the best outcome for the individual school was not always smooth sailing.
